

CS411 Team Assignment 2 - User Stories: US3.2.2 (revised)

Group 20 - Manish Patel, Ji Zhang, Chen Feng, Curtis Mason and Takamitsu Shirono

**Calendar Features:**

**Create Invitation:**

**Event Attendee View:**

After following the URL that is given by the event owner to the attendees, they will be prompted to login with Google OAuth. This will bring them to a page that displays a calendar populated with their public Google Calendar events. They will then see a text box on the left hand-side with emails of the attendees who have shared their calendars. On the bottom of the page, the attendees will see a text box of the event time frame Start/End Dates along with a Share Calendar button. Once the Share Calendar button is clicked, the attendee's calendar will be shared and populated on the event owner's **Main Page**, at which point the event owner can **Create Group Event** that fits everyone's schedule.
